Questions about .NET CAS Client? Discussion?

# NYC CAS Meetup Recap

- Featured .NET CAS Client talk / demo as just presented.

# Who's maintaining what

- Discussed CAS modules and initiatives, who's maintaining what
- Identified some minor gaps
- Identified BerkeleyDB feature for deprecation

# Who's running CAS on what

- Discussed Servlet Container support
- Tomcat remains most common
  - VMWare vFabric tc server as a proprietary Tomcat packaging with support? Sounded popular.
- Yale using JBoss (minor tweaks)
- Other servlet containers
  - Need for volunteers to own testing and maintaining support for additional containers, especially those unavailable to current CAS developers

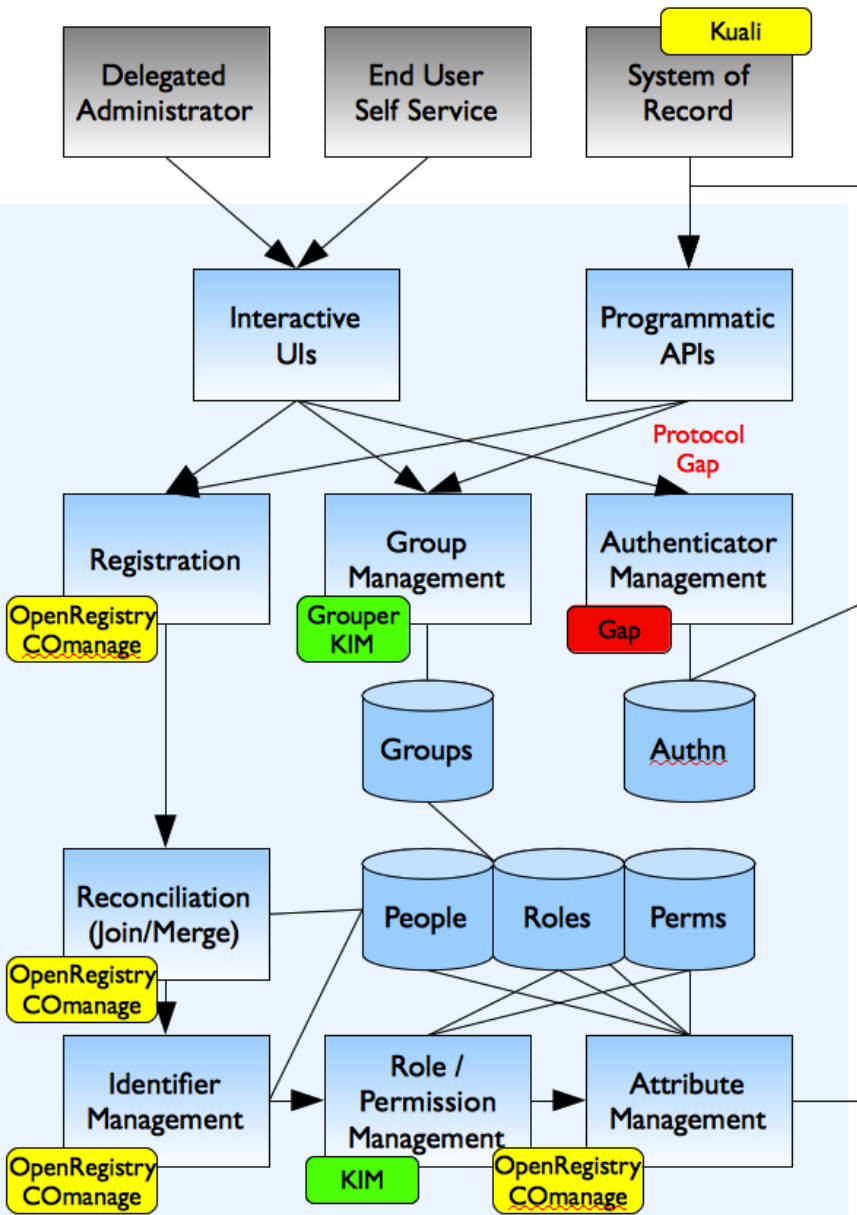

# FIFER

- Benn Oshrin presented brief introduction to Free Identity Framework for Education and Research
- <https://wiki.jasig.org/display/FIFER/Home>
- Feeling: loosely relevant but not immediately actionable in CAS-as-product?

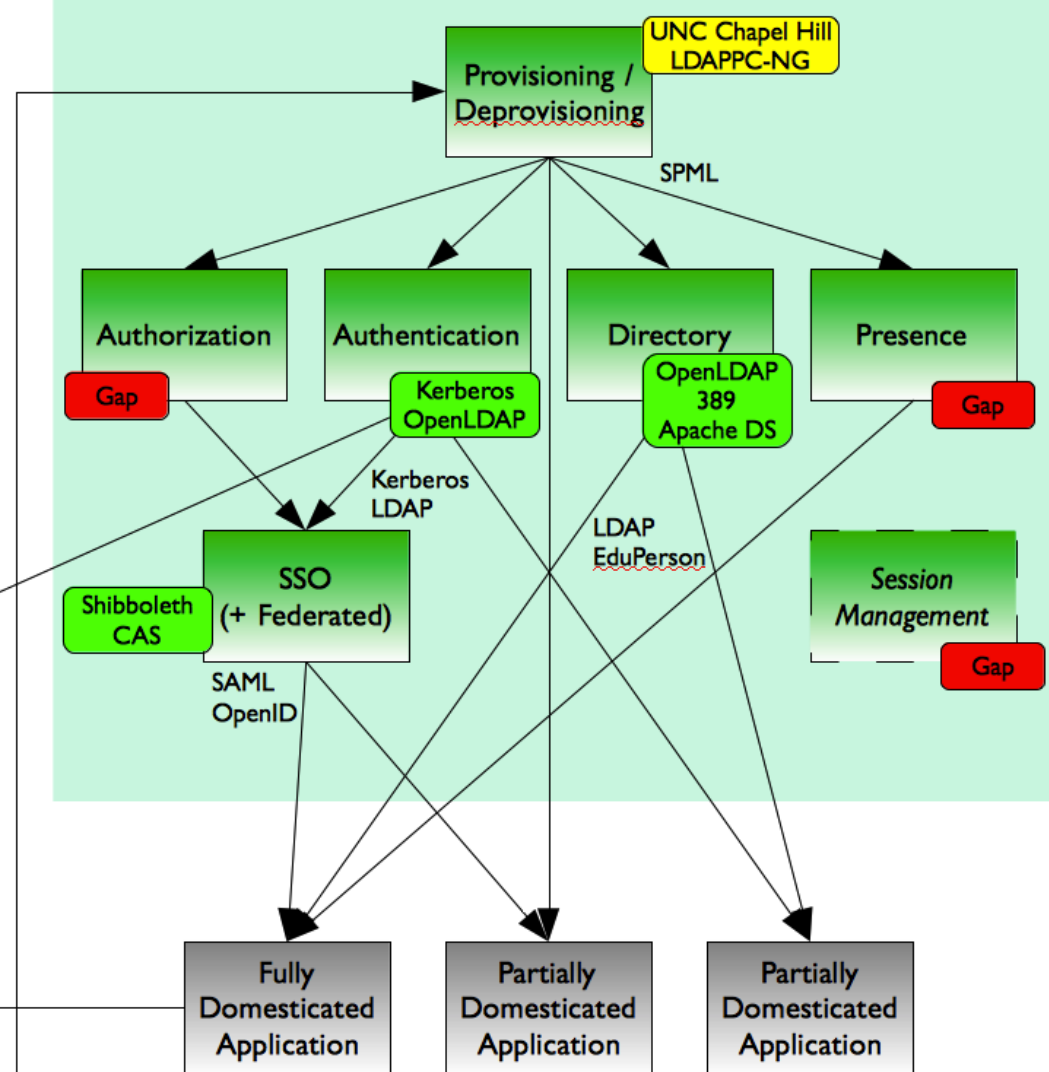

# Enterprise Identity Management

Open Source Options, October 2010

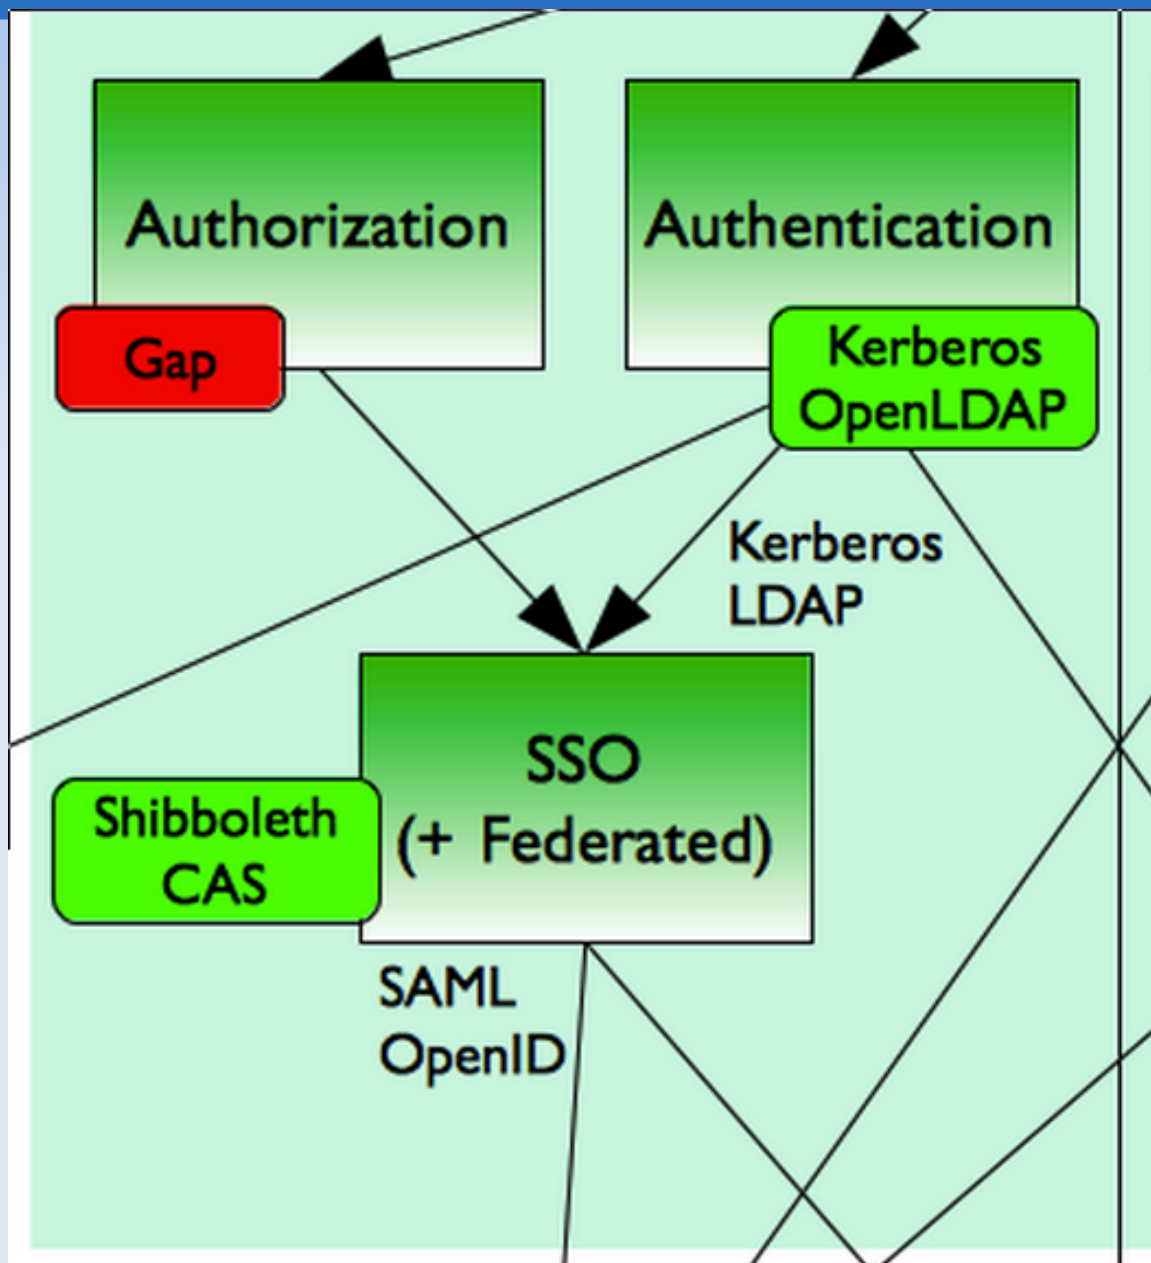

# Identity Services

•Read-mostly identity data for application use

Recommended, Production Quality
Developing Product to Watch

# CAS in overlay

# Password policy

- Existing contributed extensions in wiki
  - Drawn into SVN for collaboration
- Discussed requirements
  - Minimal invasiveness
  - Locked, disabled accounts
  - Stale, expired passwords

# CAS4

- Scott Battaglia demonstrated code that would be Milestone 1
- Looked at APIs
- CAS4 is being developed in cas3 trunk
  - Yes, that's confusing, sorry.

# Discussion

- About .NET CAS Client?
- About NYC CAS Meetup?
- About anything else CAS?
